PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 6 years' experience delivering scalable, mission-critical applications. Skilled in JavaScript/TypeScript, React, Node, Next.js, and cloud platforms (AWS/GCP). Proven track record leading small teams and owning full SDLC for high-impact systems.

SKILLS

Programming Languages: JavaScript, TypeScript, Python, HTML5, CSS, SQL

Frameworks & Libraries: Node.js, Express.js, React.js, Next.js, FastAPI, Tailwind CSS, Bootstrap, Material UI

Databases & APIs: PostgreSQL, MySQL, Sequelize, MongoDB, GraphQL, RESTful APIs

Cloud Platforms & Tools : AWS, GCP, OpenAI API, LLM Integration

Lifecycle & Scaling: Full SDLC ownership, microservices architecture, system design, team leadership

WORK EXPERIENCE

Gophr App Inc

Lake Charles, LA, USA

Senior Full Stack Software Engineer

Jan 2020 – Present

- Developed and maintained **3 of 4 core microservices APIs** (Shipments, Users, Inventories) supporting Consumer, Driver, Merchant, and Dispatch Dashboard apps, handling **thousands of daily requests** and powering the platform's e-commerce and delivery operations.
- Led frontend **Admin dashboard** implementation, streamlining orders, users, and inventory management, reducing manual work and phone calls by **~60%**.
- Integrated **OpenAI Assistant** to recommend delivery vehicles and generate quotes, reducing manual estimation time by **~70%** and enhancing customer experience.
- Designed and developed the **School Lunch System** in **1.5 months**, streamlining lunch orders for parents and improving delivery operations and user experience.
- Developed **Gophr Web Tracking**, a mobile-first delivery app with route management, GPS tracking, and signature/photo capture, currently in testing and preparing to support **hundreds of daily deliveries**.
- Contributed to the **Consumer App's ordering feature** using React Native, enhancing UX and increasing order placement efficiency by **~15%**.
- Developing **GO-PILOT**, an AI-powered load verification and FMCSA compliance photo auditing app in Flutter, building a functional prototype with all key UIs and workflows to streamline regulatory processes.

China United Network Communications Group Co., Ltd

Beijing, China

Data Scientist/Product Manager

Apr 2016 – Nov 2017

- Designed **Intelligent Transportation Analysis System** for Ministry of Transport, processing **3 GB/min of real-time mobile signaling data**, showcased on national news.
- Developed **Population Heat Map Analysis Platform** for precision marketing, improving client performance by **~10%** for P&G, JD, Baidu, and Starbucks.
- Built **tourism big data SaaS** used by over **10+ provinces** for Ministry of Culture and Tourism, enabling data-driven decision-making.

Expert Microsystems, Inc

Beijing, China

Data Scientist/Product Manager

Apr 2012 – Apr 2016

- Maintained and supported **Prognostic and Health Management system** for industrial equipment, ensuring high reliability and operational performance.
- Designed **Real-time Diagnosis Platform** for electromechanical systems, enabling faster issue detection and predictive maintenance.
- Provided **technical support** for software and consulting projects, contributing to **~30% of company revenue**.

EDUCATION

Master of Science, Mathematics with Computer Science Concentration, **McNeese State University**

Dec 2019

Master of Engineering, Thermal Energy and Power Engineering, **Beihang University**

Mar 2012

Bachelor of Engineering, Thermal Energy and Power Engineering, **Tianjin University**

Jul 2009
